

Press Release – December 2006

Concept 14.4V Impact Driver and Collated Autofeed

Winner of Top Product Award Professional Builder Magazine

Concept is proud to announce that the 14.4V Impact Driver and Collated Autofeed has been chosen by the readers of Professional Builder , the number 1 trade magazine , as one of the Top Products of 2006 .

The tool is the world's first that combines an impact driver and collated autofeed in one tool , so representing two tools in one and extremely good value for tradesmen .

The tool in its simplest form is a 14.4V Impact Driver with more power than any other 14.4V and most 18V impact drivers at 167Nm . Powered by extremely reliable Sanyo batteries this tool has proven very popular since launch earlier this year . With the collated autofeed attachment fixed in place it is capable of handling collated screws from 25-55mm and is ideal for drywall and collated woodscrews .

As the tool has about 10x the power of any other collated autofeed it is suitable for more or less all collated strips and can fit collated screws in any application , it will even fit collated screws to the hardest of hardwoods .

The specification of the tool is as follows –

- 14.4V
- 2 x 2.4Ah Sanyo NiCd batteries
- 2300 RPM , 3000 BPM
- 167Nm of Torque
- 25-55mm Collated Attachment
- Countersink Control
- Screw gauge for all sizes 25-55mm
- Forward , Reverse , Variable Spin Speed , All Metal Gearbox , Electric brake
- LED Light built-in
