

The Ultimate Woodscrew from Concept

If you are searching for the ultimate wood screw, look no further than the KTX from Concept.

Created by one of the world's leading developers of screw technology it's unbeatable in terms of quality, capability, reliability, consistency and value for money.

Having received universal acclaim and a host of awards for excellence and ingenious design, the KTX is the secret to a really professional finish.

Compatible with a variety of screw bits the KTX provides a stick-fit to the screw head, this means more torque is transferred into the screw, so there is no slippage or wobbling and require less handling when starting them off.

It's also the best screw to use with an impact driver because it requires less energy than similar products and is accompanied with a free 50mm KTX bit which is ideal for impact drivers .

KTX is suitable for all wood types, providing reduced splitting and allowing a flush fit. The screw is also through hardened for strength and is wax coated, permitting smooth penetration into the wood.

The double-countersunk head leaves a smooth surface finish whilst the under-head ribs and tips allow perfect fitting. Because the head recess is deep, the fit of the screw bit is also greatly improved

For extra ease and value KTX screws are packaged in durable flip top boxes and every box includes a KTX bit free of charge .

Concept Power Tools and products are available from Builders Merchants Nationwide. For more information or to find a local stockist visit www.conceptdistribution.co.uk or call 0845 6026 230
