

Durofix wins Top Product Award 2008

Concept is proud to announce that its NEW 18V Li-ion Impact Wrench / Driver has been voted one of this year's Top Products, by Professional Builder magazine.

The award, based on reader responses, highlights some of the most well received products to be introduced to the industry over the last twelve months.

As the only power tool to achieve this recognition, the award bolsters Durofix's growing reputation for excellence.

The new range sets the standard in compact Li-ion power tools at 18V. The Impact Wrench / Driver is a unique tool encompassing a ½" square wrench which adapts to a 3/8" square wrench to cover all socket sizes. It also comes complete with two additional adaptors to convert it into an impact driver.

Powered by the latest 1.4Ah Sony Lithium Ion batteries this two-in-one is very compact and weighs just 1.3kg.

At 190Nm of torque and a recharge time of just 30 minutes this power tool really is in a league of its own. It offers great capability and versatility and outstanding value-for-money. It has a one year warranty, and is secured in a professional hard, durable carry case, accompanied by spare bits and brushes. And as if that wasn't enough, it also comes complete with a free-of-charge super bright LED lamp which is powered by the tools battery.
