

PB's Top Products 08

Over the following six pages you will find a selection of the products, services and literature that have generated the most interest from the readers of Professional Builder and Professional Heating & Plumbing Installer magazines. These top titles boast a combined circulation in excess of 180,000 and receive enquiries in their thousands from trade professionals each month.

The magazines are distributed from the merchant trade counter, so this feedback is coming direct from YOUR customers — providing you with a detailed breakdown of exactly what they want to find at their local merchant.

Concept Distribution Durofix 18V Li-ion Impact Wrench Driver

Size does matter, and the compact yet powerful Durofix 18V Li-ion Impact Wrench Driver has proved to be a big hit with the readers of PB. The tool uses the tried and tested technique of hitting the drive shaft with a series of small blows to deliver kinetic energy over and above the regular torque, providing more power for the end user.

In a recent test the blow-moulded cases for these tools caught Professional Builder's Products Editor, Roger Bistry's eye and its small accessories case was appreciated for keeping the necessary drill bits to hand.

Irwin Jack 880 Universal Triple Ground Saw

The humble saw is a far more complex piece of kit

than at first it might appear. The latest incarnation of Irwin's ever-popular Jack 880 Universal Triple Ground Saw is available in either 20in. or 22in., providing the end user with a saw for all materials.

The tool's advanced triple ground teeth provide a third cutting angle at the bottom of the tooth which ensures a 25% faster cut and a smoother finish.

Artex BladeRunner

The truly innovative BladeRunner tool has been a big hit with plasterers and dry liners. It cuts plasterboard quickly, accurately and safely and is particularly effective at producing shapes for box work and arches.

Simply position the tool on the edge of the plasterboard with the board sandwiched between the two magnetic parts and then guide the tool down the length of the board for a perfect cut every time.
