- Deep thread
- Quality coating for longer life
- Greatly reduced splitting in timber
- 25 degree sharp start point
- Available in boxed or bulk tubs in popular sizes
- Super **TIGHT HOLD®** head is perfect for impact drivers

WHAT SEPARATES KTX FROM OTHER SCREWS

- The KTX Super **TIGHT HOLD**® head recess is unique and provides the best head recess for driving in and taking out screws.
- KTX requires less than half the energy of a normal screw to fix so prolonging power tool battery life.
- KTX 50mm hardened steel screw bit comes free with each box – ideal for impact drivers as well as drill drivers.
- All screws are manufactured to a high standard by one of the world's top producers of quality screws using heat treated hardened steel and subject to strong quality controls.

- KTX Bronze external woodscrews are coated with an inert material that does not react with treated timbers and which is C4 rated guaranteeing a minimum 15 years in timber. KTX Bronze are salt spray tested to 2,000 hours which is double most other external and decking screws.
- All stainless steel screws are made using A2 SS302 grade stainless steel which is the benchmark standard for construction. The KTX Super **TIGHT HOLD**® head recess significantly reduces head damage when using stainless steel.

- The screw design works with the rotation of the screw to maximum effect meaning fast entry and a super smooth finish in timber.
- KTX is an award winning CE rated EN:14592 product that is the recommended choice of some of the country's top product testers.
- **KTX is the best value for money professional woodscrew on the market.**
